Every Day You Don't Follow Up Is Revenue Walking Out the Door

Your leads go cold overnight. Your estimates sit unclosed for weeks. Your invoices go unpaid for months. And you're too busy running jobs to chase any of it.

 Avg response time: 3+ hours

 30%+ of estimates never followed up

 Overdue invoices aging 60–90 days

WHAT CLAIRE DOES

Every Lead Called. Every Estimate Followed Up. Every Invoice Chased.

Claire is your AI business system — not a chatbot, not a form, a real voice that calls, qualifies, books, and recovers revenue automatically.

Never Miss a Call

Claire answers every inbound call 24/7, qualifies the lead, and books the appointment directly into your system.

✓ Zero missed opportunities

60-Second Lead Response

New Angi or web lead? Claire calls within 60 seconds during business hours. Overnight leads get a call at 8 AM sharp. First to call wins the job.

✓ 3–5x higher lead conversion

Recover Lost Revenue

Estimates cold after 7, 14, or 30 days? Claire calls automatically. Overdue invoices? Escalating contact sequence — no awkward calls for your team.

✓ More closed jobs, faster payments

See Everything

Six live dashboards show open estimates, ad performance, customer lifetime value, collections, and daily operations. Refreshed hourly.

✓ Full visibility, no spreadsheets

Smarter Ad Spend

Every completed job fires attribution data back to Meta automatically. Your ads get smarter over time, lowering your cost per lead.

✓ Better ROAS, lower CPL

Morning Briefing

Every morning you receive a plain-English summary — what Claire did overnight, leads called, estimates followed up, invoices chased.

✓ Always know what's happening

"891 Angi leads. Now every single one gets called automatically."

PLANS & PRICING

Simple, Transparent Pricing
